**For more than 25 years we have been producing  
mugs and cups marked with individual print**

We have more than 6000 sq.m. of production and warehouse halls with modern machinery and an experienced crew. We have our own design studio with Geometric Design system coupled with CNC machine for perfect shape quality.

**As the only company in Poland we realize our own production of ceramics from all its stages**

**Stoneware is a type of ceramic that allows enamel in any color**

It is made of kaolin, feldspar and quartz. The formed products are fired at a temperature of about 1200°C in order to achieve the intended fluid resistance, strength and hardness.

**Our products are designed and manufactured in Poland**

We use only safe raw materials - environmentally pure ceramic clay and glazes produced by leading manufacturers in the European Union. The products of this series provide the highest quality. All products are protected by copyrights.

We offer traditional and contemporary techniques of decorating ceramics

# Our team’s experience allows us to make complex prints and projects

## Ceramic decal

The most sustainable method of the decorations of the ceramics, which is done in screen-printing. After imposing on the product, decal is burned in high temperature which provides the highest quality, durability, resistance to abrasion, temperature, chemicals, washing in domestic dishwashers. It enables to place the imprint inside the cup, on the handle, on the bottom, to do personalisation, pictures and printing in Full Color (CMYK).

## Direct printing

A cost-effective method for decoration of pottery, which is performed using a ceramic inks printed directly on the mugs and then burned at high temperature, so that the printing is resistant to any damage. Enables printing full colors, on the specified surface, on the outside of the product.

## Organic printing inks

Unlimited colors (Cyan, Magento) and CMYK prints. Fluorescent colors also available. These inks contain no heavy metals. Imprints are resistant to solvents, acids and alkalis and to temperatures up to 10 degrees C. The resistance to Scratching of the imprints is comparable with household pointed objects.

## Chemo-setting

The most economic method of decoration, made using chemo-setting inks on the machine for direct printing. It has limited durability to mechanical damage. Does not require the firing of the imprint. Printing in full colors, on the specified surface, on the outside of the product. Manual cleaning is recommended.

## Thermo active

The thermo active ink is put on the previously fired printing, it covers the whole printing or its part. After pouring the hot liquid the thermo active ink becomes transparent. Enables printing on the specified surface, on the outside of the product. Manual cleaning is recommended.

## Embossed decoration

The method of decorating with a ceramic carbon the convex part of the cup surface. After applying to the product, the tracing paper is fired at a high temperature, which ensures the highest quality, durability, resistance to abrasion, temperature, chemicals and washing in dishwashers.

**In addition, we offer spray painted products and clay-colored products**

#### **Spray painting**

Painting with high temperature paints, painting is done by the KUKA robot. Spray-painted products are resistant to damage mechanical and washing in dishwashers. Can be used on selected stoneware products and porcelain. All imprint technologies are available for these products.

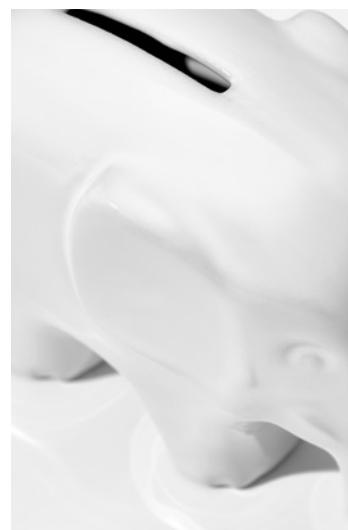

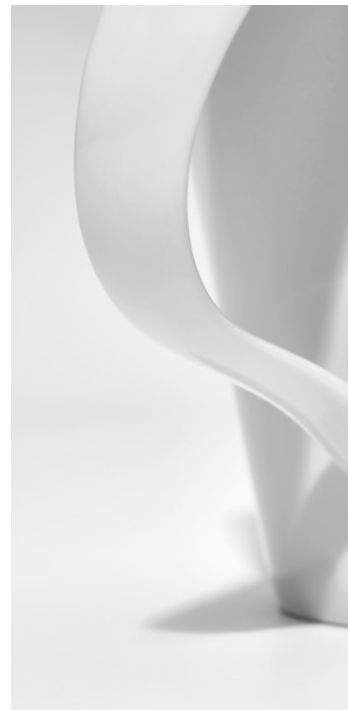

#### **Clay-colored products**

Products made with colored ceramic clay. Glazed only inside. There are 4 colors available. Technology available for selected products.

Avant Stoneware Factory is one of the largest employers in the region. From the beginning of existence also employs people with disabilities. In 2007 we obtained a “W Pełni Zaradni” certificate. In 2010 Avant joined the Polska Izba Artykułów Promocyjnych. In 2019 we were awarded with the Marka Lubelskie certificate.

**Creating new jobs for its people Avant contributes to the development of the municipality**

## We work with the best designers of industrial design

The Kabo&Pydo duo formed by Katarzyna Borkowska and Tomasz Pydo, deal with the design and implementation of manufacture include: ceramics, glass, furniture, lighting. Young, gifted, highly paid with numerous prizes and distinctions, conquer the world with unique projects. Their products feature a unique design that goes hand in hand with convenience - they use ergonomic handles and design bottoms that allows water to run when washing in dishwashers.

PACKAGING

MADE IN  
POLAND

## Packaging

**We offer individual packaging for our products, for sets of mugs, occasional packaging and packaging made for special orders**

---

In our printing house, it is possible to apply the print to individual packaging, the offer also includes packaging with CMYK print and laminated packaging. It is possible to make individual packaging for each product in our offer. The high paper weight used for their production gives additional security during transport. The standard packing method are bulk boxes.
